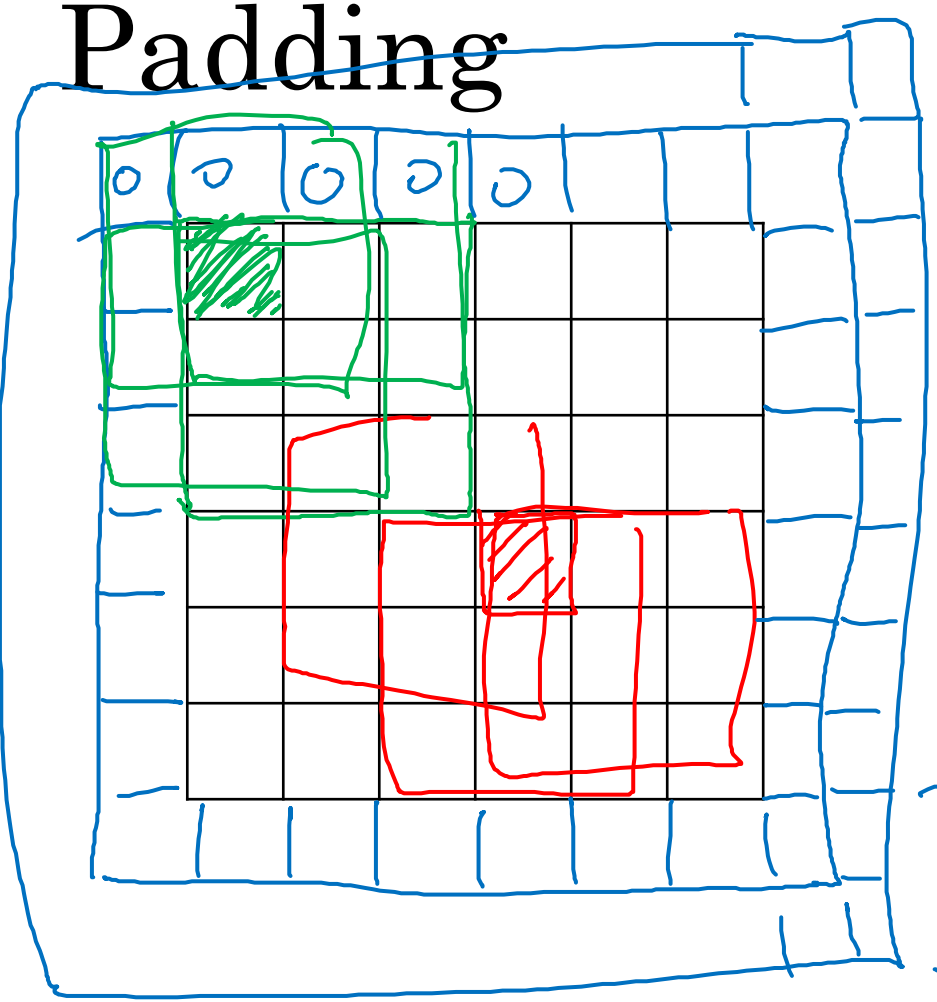
Convolutional Neural Networks

Padding

Padding

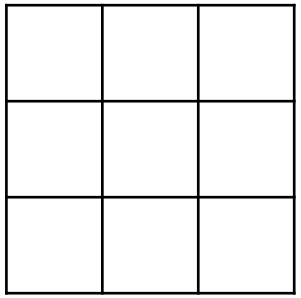
- shrinky output
- throw away into from edge

So this effective maybe not quite throwing away but counting less the information from the edge of a corner or the edge of the image is reduced.



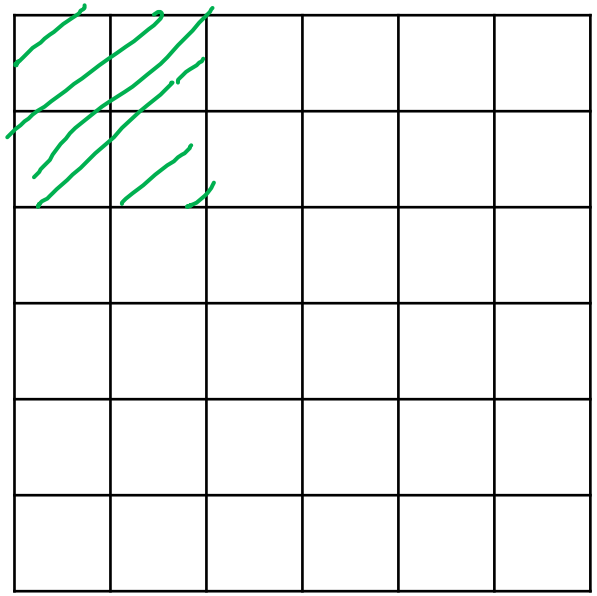
p=2

*



3×3
f×f

=



6×6

6×6 → 8×8
n×n

n-f+1 × n-f+1
6-3+1=4

→ ~~4×4~~

p = padding = 1

n+2p-f+1 × n+2p-f+1
6+2-3+1 × ___ = 6×6

Andrew Ng

Valid and Same convolutions

How to pad

"Valid": no padding

$n \times n \quad * \quad f \times f \quad \rightarrow \quad n-f+1 \times n-f+1$

$6 \times 6 \quad * \quad 3 \times 3 \quad \rightarrow \quad 4 \times 4$

"Same": Pad so that output size is the same as the input size.

$n+2p-f+1 \times n+2p-f+1$

$n+2p-f+1 = n \Rightarrow p = \frac{f-1}{2}$

$3 \times 3 \quad p = \frac{3-1}{2} = 1$

$5 \times 5 \quad p = 2$

f is usually odd

1x1

3x3

5x5

7x7
